

JEREMIAS DAVILA

AI Engineer

Córdoba, Argentina | jeremiasdavila@hotmail.es | +54 3512185897 | [linkedin.com/in/jeremias-davila](https://www.linkedin.com/in/jeremias-davila) | [Portfolio: imsherlocked27.github.io](#)

PROFESSIONAL PROFILE

AI Engineer with 4+ years of experience designing and shipping production AI solutions: from autonomous agent architectures and retrieval-augmented generation (RAG) pipelines, to integrating large language models (LLMs) into real products and deploying them on cloud infrastructure. Hands-on experience orchestrating specialized sub-agents, indexing and retrieving complex technical knowledge through semantic search, and deploying microservices (Docker, FastAPI, CI/CD) on AWS and Azure. Solid background in Deep Learning (PyTorch) and data science, currently focused on taking generative AI systems from prototype to production, integrated with APIs, databases, and existing systems.

TECHNICAL SKILLS

Generative AI & Agents: Agent-based architectures (sub-agent orchestration, sequential/parallel execution), LangChain, LangGraph, RAG, prompt engineering, chatbot development, LLM API integration (OpenAI, Anthropic/Claude)

Information Retrieval (RAG): RAG pipeline design, ingestion and indexing of technical documentation, semantic search, retrieval quality and accuracy evaluation

Cloud & Deployment: AWS (S3, SageMaker), Azure (DevOps, AI Services), Docker, FastAPI, microservices deployment, CI/CD, observability, MLflow, Git

Deep Learning & Data Science: PyTorch, scikit-learn, regression, classification, clustering, A/B testing, hypothesis testing, predictive modeling

Data & Pipelines: Python, SQL, R, pandas, NumPy, PySpark, Hive, ETL design, data quality monitoring

Visualization: Dashboards, Recharts, data storytelling for technical and business audiences

PROFESSIONAL EXPERIENCE

AI Engineer — Caranty Córdoba, Argentina · Oct 2025 – Mar 2026

- Designed autonomous agent architectures (agentic workflows) integrated with company systems and databases, coordinating specialized sub-agents across different business tasks.
- Built a document processing system and an internal RAG-based knowledge assistant, with ingestion, indexing, and semantic search over technical and business documentation.
- Developed a conversational CRM agent over sales data, connecting language models to REST APIs and SQL databases, owning the full pipeline from data access to user response.
- Managed CI/CD pipelines in Azure DevOps for continuous deployment and iteration of AI systems in production.

Lead AI Engineer — Freelance / Independent Consultant Remote · Jan 2024 – Present

- Designed and deployed LLM-based AI applications and chatbots, integrating generative AI APIs (OpenAI, Anthropic/Claude) into client products and systems.
- Developed custom conversational flows, prompts, and RAG pipelines tailored to domain-specific use cases.
- Built evaluation frameworks to monitor accuracy, latency, and output quality of models in production.
- Reduced inference costs and latency by over 30% through prompt optimization and improved API integration patterns.
- Led small engineering teams (3–5 people): code reviews, architecture decisions, and sprint planning.

AI & Data Science Consultant — Infolytics Argentina Argentina · Oct 2024 – Feb 2026

- Delivered end-to-end ML solutions for retail and logistics clients: from exploratory analysis to model deployment and monitoring in production.
- Designed ETL pipelines with PySpark for large-scale data extraction and feature generation.
- Containerized services and configured CI/CD for automated model deployments, with post-deployment observability.

Data Scientist — Campaign Analytics — Maltería & Cervecería Quilmes Argentina · Mar 2024 – Oct 2024

- Analyzed company databases to support marketing strategy, identifying campaign performance patterns and customer behavior.
- Designed A/B testing and statistical validation frameworks, contributing to a ~20% increase in redemption rate.

- Automated reporting pipelines in Python, reducing manual analysis time by ~40%.

Data Scientist / ML Engineer — Baufest *Argentina · Jan 2022 – Mar 2024*

- Developed predictive models and data analysis solutions for enterprise clients across multiple industries.
- Built data processing and feature engineering pipelines with Python (pandas, NumPy, scikit-learn, PySpark).
- Collaborated with cross-functional teams (product, engineering, business) to identify high-impact opportunities for AI/data.

EDUCATION

Associate Degree in Artificial Intelligence and Data Science — IES Siglo XXI (2020 – 2022)

Probability and Statistics, Machine Learning, Deep Learning, Python, R, SQL.

CERTIFICATIONS

- People Analytics — Coursera (2024)
- Baufest PEI Program — Baufest (2023)
- Microsoft AI Product Manager — Coursera (in progress)
- Google AI — Coursera (in progress)
